

# Vaccar Feed Dispenser

TI2523

REV: A

*A durable, simple, easy to install solution to in-parlour feeding*

**Made In The UK**

## Features

- Rotationally moulded from polyethylene
- Vented discharge spout
- Loose lid
- Recess for 50x25mm box trunking
- 24 volt DC motor and discharge auger assembly
- Simple sliding U framed wall brackets
- Oversized collar avoids any physical connection to the feeder outlet

## Benefits

- Quick to install with simple wiring
- Strong, light weight and will never rust
- Available in red and blue
- Designed to avoid getting clogged with congealed feed dust
- Lid ensures the unit is bird and vermin proof
- Low amperage so smaller power supply required
- Brackets allow engineers to slide the feeder away from the wall to perform remedial work or service and maintenance
- Cows are unable to obtain additional feed by banging on the feed chute helping to discourage damage to equipment

Open Ended

Breather outlet prevents condensation and feed clogging.

Trunking groove makes mounting and wiring quick and easy.
