**WE MAKE  
WORKWEAR FOR  
FARMERS.  
THAT'S ALL WE DO.**

# OUR STORY

Betacraft was founded by a man with an inventive spirit and an important goal: to keep New Zealand farmers warm, dry and comfortable. Born in 1914, David Beatson became acutely aware of the demands of outdoor life while serving in World War II.

Arriving home, he traded his city job for rural life. His entrepreneurial spirit saw him start a business out of his Palmerston North garage, supplying and repairing horse and cow covers.

With a ready supply of customers at the back door, David honed his skill and developed a reputation for garments that were robust, durable and unfailingly waterproof. His craft eventually evolved to workwear suited to New Zealand farming conditions.

Now into its fourth generation, Betacraft remains a family business committed to producing long lasting gear that can withstand the most extreme outdoor conditions.

# OUR VALUES

## TRUSTWORTHY

Unfailingly waterproof gear, robust enough to stand up to the test and a promise to deliver only the best to our customers.

## AUTHENTIC

Honouring our roots, staying committed to the people and the industry that we know and love.

## INNOVATIVE

Inspired by resourceful and inventive farmers and growers. We endeavour to match that innovation by seeking out the best tools to turn a challenge into a champion.

## AGILE

We're striving for continuous improvement of people, practices and processes, keeping us at the top of our game.

**SINCE 1952, WE'VE BEEN MAKING GEAR  
THAT WORKS AS HARD AS YOU DO**

# OUR JOURNEY OF SUSTAINABILITY

*Guiding us on our journey to support farmers and growers to get the job done*

We understand that the future of farming depends on achieving positive environmental outcomes. That's why we are taking steps towards minimising our impact on the planet and those who live here. We're listening to the needs of farmers and designing better garments that help you get the job done. Our commitment is to create conscious

workwear that doesn't compromise on performance. As with many farmers, our work towards a better, more sustainable future is a journey. We are just at the start of ours, by working with recycled fabrics, organic fibres and global standard audits across our supply chain.

## PACKAGING

Rather than single use (plastic) bags, we're using alternatives made from PLA for our ISO940 & PVA Polymer for Quest collections. Manufactured with non-toxic resources which are less harmful than petroleum-based plastic as well as being fully biodegradable.

## GRS CERTIFIED FABRICS

Piece by piece, we are reviewing our range. The ISO940 and Quest collections have been the first to be made from GRS\* certified recycled fabric for both the outer and lining.

## RECYCLE OLD WORKWEAR

Minimising the load on landfill, we have partnered with Upparel\* in Australia and New Zealand who collect, sort and re-purpose retired workwear on our behalf.

## MANUFACTURING

SMETA certification helps protect workers from unsafe conditions, overwork, discrimination, low pay and forced labour. Businesses use SMETA to make improvements to working conditions and environmental performance.

\* Upparel is Australia & New Zealand's leader in textile recovery and recycling. Upparel partners with brands to help keep valuable used textiles out of landfill. [upparel.nz](http://upparel.nz)

\* Global Recycling Standard (GRS) applies to products that contain at least 20% recycled material. Each stage of production is required to be certified from the recycling stage all the way through to the retailer.

# ISO940

ADVANCED WORKWEAR

The ISO940 collection has been developed over several decades of making workwear for New Zealand farmers and growers. The weather conditions typical to New Zealand can include extreme winds, heavy rain and freezing temperatures. The ISO940 parka and overtrouser are windproof, waterproof and the fabric technology ensures a regulated body temperature while working. Thoughtful construction allows freedom of movement while working.

Rigorous testing and design revisions mean this collection has a range of considered features. The FitGo hood offers cover and reliable protection from rain even in high winds. The two-way zip allows the wearer to sit, kneel or climb. Multiple waterproof pockets are ideal for cellphones and tools. Magnetic closures\* on both the parka and overtrousers are easier to operate in cold temperatures and still function when covered with mud.

### TETRATEC 4-LAYER TECHNOLOGY

“

*To be totally honest I'm really glad we've found Betacraft. I've spent a fortune looking for decent work wear and usually the money is just wasted - these seem to be easily the best so far.*

@THEHOOFGP | UNITED KINGDOM

# HERITAGE

A modern take on a classic style

Tough and warm with pockets a plenty, the Heritage jacket is great for tackling the elements wherever you take it. Robust enough for a day on the farm, but stylish enough for the sidelines on a Saturday morning at the local sports club. It keeps the wind at bay and combats light seasonal rain. You won't want to leave the house without your Heritage jacket.

# QUEST FLEECE

Cosy and durable fabrics in timeless styles

The Quest fleece collection was developed to offer warmth as a versatile mid-layer that is easy to care for. There are several styles offered in this collection all of which are constructed from high quality anti-pill polar fleece. Ranging from 280-360gsm the chosen fabrics for selected styles are made from recycled materials which carry the GRS certification, and were selected for their fast drying and easy care properties. Some garments in the Quest fleece collection have additional features built in such as; wind blocking liners, zip pockets and nylon reinforcement panels. The packaging for this collection is made from a PVA polymer that can dissolve in hot water.

# SHIRTS

Build your work wardrobe with these Betacraft favourites

Available in a range of colours, our Brushed Cotton shirts are a versatile and comfortable wardrobe essential. Cotton is a light and breathable option ideal for wearing against the skin, especially when layering underneath your rainwear. The addition of a western yoke pleat on the back allows for greater garment integrity and freedom of movement while you work.

## HOW WATERPROOF?

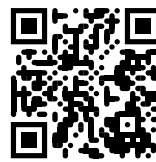

Globally, there is a standard test method that determines how waterproof a fabric is which is known as a 'hydrostatic head' test. This test provides a unit of  $\text{mm/m}^2/24\text{hrs}$  and is performed using a hydrostatic head test machine. The measurement is obtained by sealing a section of the fabric and mechanically applying water pressure to that section of fabric. The water pressure is applied in a way which mimics a large vertical column filled with water being placed on the fabric. It measures how much water pressure a fabric can endure before water begins to penetrate. The waterproofness of the fabric itself is just one component that contributes to how waterproof a garment is. Features like seams and closures make a big difference to how a garment performs.

## WATER COLUMN RATING EXPLAINED

## LIMITED LIFETIME GUARANTEE

Betacraft is committed to providing quality products. That's why we offer a Limited Lifetime Guarantee for the lifetime of the garment. Eventually all products wear out with time and end use. However, if one of our products fails due to a manufacturing fault, we will offer a free repair or replacement.
