

Cow Drencher

Easily and quickly
drench cows!

The **Cow Drencher** enables cows to be dosed with up to 25 litres of water or electrolytes. With 350 ml of fluid delivered per stroke of the pump, drenching is quick and easy to do.

drencher
in action!

**Dairy
Spares**

The **Cow Drencher** is designed with two handles making it easier to move when full. Together with the Cow Drencher Trolley, it is easy to transport to cows in need.

Which cows benefit from drenching?

The **Cow Drencher** is ideal for delivering water and/or electrolytes to restore the hydration balance of weak cows including newly calved cows, cows with *E.coli* mastitis, milk fever or ketosis, and also for downer cows and post-surgery cases.

**A handy piece of kit for
beef and dairy farms.**

Available through
Dairy Spares stockists.
