

COWKING ROTATING CATTLE BRUSHES

FROM

SWING

Ideal for full body coverage, neck and head.

Dairy Spares

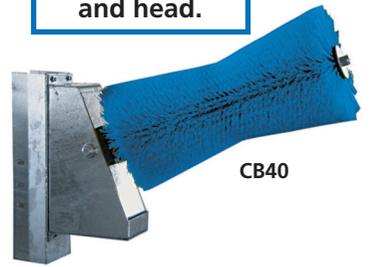

CLASSIC

Ideal for back and head.

PATENTED DESIGN

CB41

CB40

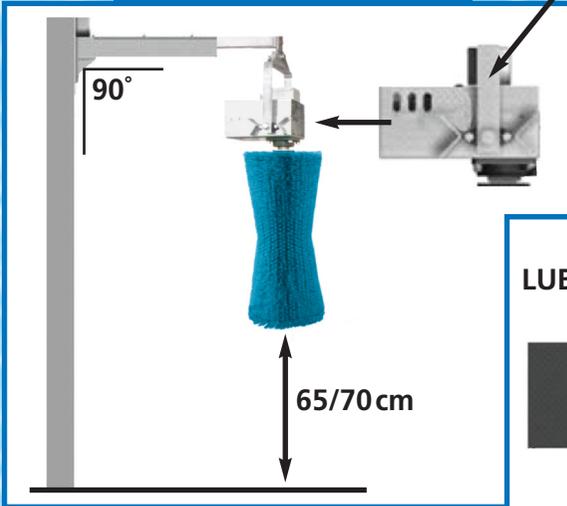

CowKing Cattle Brushes allow cows to fulfil their natural requirement to groom. The CowKing Swing Brush is patented so as the brush does not moved beyond 45 degrees which maintains the optimum friction between cow and brush, maintaining the best pressure on the skin to stimulate blood circulation.

Research has demonstrated that cattle brushes increase grooming time and frequency. As a consequence this reduces stress and increases blood circulation. This has been proven to reduce the cases of clinical mastitis by over 30% and increase milk production by up to 1kg/day.
