4 First aid measures

- Description of first aid measures
 General information No special measures required.
 After skin contact The product is not skin irritating.

(Contd. on page 2) ĠВ

Page 2/5

Safety data sheet according to 1907/2006/EC, Article 31

Printing date 02.12.2013

Revision: 02.12.2013

Trade name: Technovit powder 6091

(Contd. of page 1)

- · After eye contact Rinse opened eye for several minutes under running water.
- After swallowing Initiate vomiting and consult a doctor.
- · Information for doctor
 - Most important symptoms and effects, both acute and delayed No further relevant information available.
 - Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Firefighting measures

· Extinguishing media

- Suitable extinguishing agents
- CO2, extinguishing powder or water jet. Fight larger fires with water jet or alcohol-resistant foam.
- Special hazards arising from the substance or mixture No further relevant information available. • Advice for firefighters
 - · Protective equipment: No special measures required.
- · Additional information -

6 Accidental release measures

- · Personal precautions, protective equipment and emergency procedures Not required.
- Environmental precautions: No special measures required.
- Methods and material for containment and cleaning up: Collect mechanically.
- Reference to other sections
 No dangerous materials are released.
 See Section 8 for information on personal protection equipment.

7 Handling and storage

- · Handling
 - Precautions for safe handling No special measures required.
 Information about protection against explosions and fires: No special measures required.
- · Conditions for safe storage, including any incompatibilities
 - Storage
 - · Requirements to be met by storerooms and containers: No special requirements.
 - Information about storage in one common storage facility: Not required.
 - Further information about storage conditions: Store cool (not above 25 °C).
- Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters
 - · Components with critical values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

• Additional information: The lists that were valid during the compilation were used as basis.

- · Exposure controls
 - Personal protective equipment
 - · General protective and hygienic measures
 - The usual precautionary measures should be adhered to in handling the chemicals.
 - · Breathing equipment: Not required.

Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• For the permanent contact in work areas without heightened risk of injury (e.g. Laboratory) gloves made of the following material are suitable: Natural rubber, NR

· Eye protection: not absolutely neccessary

· **Body protection:** Light weight protective clothing

9 Physical and chemical properties

Information on basic physic General Information Appearance:	cal and chemical properties		
Form:	Powder		
· Colour:	According to product specification		
· Smell:	Odourless		
Change in condition Melting point/Melting range: Not determined Boiling point/Boiling range: Not determined			
· Flash point:	Not applicable		
· Self-inflammability:	Product is not selfigniting.		
• Danger of explosion:	Product is not explosive. However, formation of explosive powder/air mixtures is possible.		
· Density	Not determined		
· Solubility in / Miscibility	with		
· Water:	Unsoluble		
 Other information 	No further relevant information available.		

10 Stability and reactivity

- Reactivity
 - Chemical stability

Conditions to be avoided: No decomposition if used and stored according to specifications.
 Possibility of hazardous reactions No dangerous reactions known

Conditions to avoid No further relevant information available.

· Incompatible materials: No further relevant information available.

· Hazardous decomposition products: None

11 Toxicological information

· Information on toxicological effects

- Acute toxicity:
 - Primary irritant effect:
 - on the skin: No irritant effect.
 - on the eye: No irritant effect. Sensitization: No sensitizing effect known.

Additional toxicological information:

The product is not subject to classification according to the calculation method of the General EC Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

12 Ecological information

· Toxicity

- Aquatic toxicity: No further relevant information available.
- Persistence and degradability No further relevant information available.
- · Behaviour in environmental systems:
 - Bioaccumulative potential No further relevant information available.
 - Mobility in soil No further relevant information available.
- Additional ecological information:
 - General notes:

Do not allow undiluted product or large quantities of it to reach ground water, water bodies or sewage system. • Results of PBT and vPvB assessment

- - PBT: Not applicable.
 - vPvB: Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

Recommendation

Small quantities can be polymerized with the matching system component(s) and the cured solid material can be disposed of with the regular garbage. Larger quantities must be disposed of following the regulations of the local authorities.

· European waste catalogue

18 02 05 chemicals consisting of or containing dangerous substances

· Uncleaned packagings:

Recommendation: Packaging can be reused or recycled after cleaning.

· UN-Number		
· ADR, ADN, IMDG, IATA	Void	
· UN proper shipping name		
· ÁDR, ADN, ÍMDĞ, IATA	Void
